

emphasys: Using impact analysis and planning riskless SAP S/4HANA® transformations

emphasys is a leading company specializing in SAP implementations and cloud migrations, dedicated to helping businesses swiftly transition to the cloud while ensuring cost-effectiveness. In the ever-evolving digital landscape, emphasys stands as a trusted partner, orchestrating smooth transitions and offering data-driven solutions.

emphasys applies advanced automation capabilities to conduct a comprehensive assessment of their customer's existing system and evaluates the effects of a digital transformation. Through this approach, emphasys efficiently organizes and automates enterprise operations, allowing them to achieve project milestones and give cost-effective solutions to their clients.

KTern.AI helps emphasys use automation and data for planning SAP S/4HANA® transformations of their customers

Before: Challenges and Opportunities

- Limited visibility into business processes and a need for better understanding of emphasis' customers SAP landscape
- Challenges in evaluating systems, implementing industry-specific improvements, and identifying costs and efforts
- Custom code migration concerns and uncertainty about the timeline for SAP S/4HANA® transition
- Operational optimization to reduce SAP S/4HANA® transformation challenges
- Effective data migration strategies were essential for risk management and benefit maximization

Why SAP and KTern.AI

- KTern.AI, part of SAP's industry cloud portfolio, is employed for both comprehensive transformation projects and to expedite SAP S/4HANA® transformation with impact analysis and digital mapping
- Profiling business processes for improved visibility and process redefinition aligned with SAP scope items
- Capability to streamline and automate emphasis's enterprise operations, guided by data-driven analysis for planning the customer's SAP digital transformation
- Reviewing interfaces, user profiles, and archiving recommendations to provide a concise analysis of custom objects' impact on SAP S/4HANA® migration.
- Creating a transition timeline based on assessment KPIs and efforts for custom code remediation and optimization
- Publishing a detailed reporting dashboard for project stakeholders and offering an automated high-level road map for SAP S/4HANA® transformation, [available on SAP Store](#)

After: Value-Driven Results

- Digitalized and maximized delivery with 28% improvement in workforce productivity and 13% reduction in SAP project costs and 7X times accelerated SAP transformations
- Emphasys runs rapid analysis and reduces up to 30% manual effort in delivery
- 5% enhancement in financial performance
- Enabled effective SAP planning with a 100% digital footprint

“If you are making plans to use SAP S/4HANA, you should begin with the assessment powered by KTern. Insights on landscape, business process and custom code ensures right value to plan your SAP led digital transformation”

*Glynn Williams, Lead Architect & Managing Director, **emphasys**.*
