Problem

Complexity in Transition to S/4HANA

- **Problem:** Many companies face challenges in planning and executing the migration from SAP ECC to SAP S/4HANA.
- **Impact:** Poorly planned migrations can result in extended downtimes, data inconsistencies, and disruptions to business operations.
- **Solution**: Engaging with experienced SAP advisors who can provide a comprehensive migration strategy, including readiness assessments, detailed project plans, and phased implementation approaches to minimise risks.

Proposed Solution

SAP Readiness Assessment Package

Description: The SAP Readiness Assessment Package is designed for organizations considering a move to SAP or those preparing for an SAP upgrade. This package provides a comprehensive evaluation of your current environment and readiness for SAP implementation or upgrade.

Includes:

1. **Initial Assessment:**
   - Evaluation of current IT and business environment
   - Identification of key areas for improvement and immediate needs
2. **Readiness Report:**
   - Detailed report on the organization's readiness for SAP
   - Identification of potential risks and mitigationstrategies.
3. **Roadmap Development:**
   - High-level roadmap for SAP implementation or upgrade.
   - Timeline, milestones and resource allocation.

01/03

Benefits

- Provides a clear understanding of readiness for your S/4HANA project.
- Identifies potential risks and mitigation strategies.
- Establishes a strategic plan for moving forward with S/4HANA.

We propose a comprehensive and phased approach consisting of the following:

Discovery and Planning: This initial phase involves conducting a thorough analysis of your current system utilising an advanced tool to assess the environment including:

- **Business Process Analyses**
  - Gain visibility of your business process with comprehensive profiling of business process, understanding of the enterprise structure. Evaluate the impact of moving to S/4HANA.
- **Landscape Assessment**
  - Ensuring a clear understanding of your SAP landscape, with interface review, user profiling and licensing, archiving recommendations and Add-on analysis for compatibility to SAP S/4HANA.
- **Custom Code Analysis**
  - A deep-dive assessment of custom objects and the custom code impact on moving to S/4HANA along with effort estimation on remediation and impact to timelines in addition to risks and prioritization of developments.
- **Transformation Insights**
  - Embrace your RISE with SAP business transformation with process redefinition insights in line with the SAP S/4HANA Opportunities.
- **Timeline & Effort Estimation**
  - Obtain a high-level timeline of your S/4HANA transition.

Our Approach:

We will use KTern.AI Digital Maps to scan the respective SAP ECC production system or recent copy of production system.

The approach of this rapid, seamless assessment is based on:

- Data-driven (uses actual data in SAP ECC system)
- Non-invasive (leverages a standard RFC protocol and does not require any installation of custom plugins/addons into SAP ERP system)

Deliverables:

- A comprehensive +- 80 page Microsoft PowerPoint report.

- A fully editable Microsoft Excel Project Costing – with full resource loading, adapted to your custom code and landscape and adjusted according to your migration strategy.

The following reports in Microsoft Excel:
  - Custom code Analysis
  - Installed Add-on Analysis
  - Archiving or Housekeeping Recommendations
  - Fiori App User Experience Recommendations
  - Interface Review
  - Business Process Profiler
  - SAP Simplification Item Impact Checks
  - Training Scenario Recommendations
